

MUHAMMAD AHMAD

Unity Game Developer | 3D Games (Android) | AI-Assisted Production

Bahawalpur, Pakistan | +92 325 6296430 | +92 334 2459650 | muhammad.ahmad.gamedev@gmail.com | [linkedin.com/in/muhammad-ahmad-gamedev](https://www.linkedin.com/in/muhammad-ahmad-gamedev)

PROFESSIONAL SUMMARY

Unity Game Developer specializing in 3D simulation and action games for Android. Ships production titles in C#, using AI agents to accelerate prototyping, gameplay implementation, debugging, and iteration from first playable to release. Experienced across the full Unity pipeline in designing, coding, debugging, and shipping 3D games faster with AI-assisted workflows. Can take a game from scratch to a playable, production-ready build, including gameplay, systems, AI-driven NPCs, and polish. Comfortable owning end-to-end development for Android. Open to on-site roles in Bahawalpur and Lahore, as well as remote work.

TECHNICAL SKILLS

Engine and Platforms: Unity 3D, C#, Android, Steam / PC

AI and Agents: AI coding agents for game production (prototyping, C# gameplay, refactors, debug loops), AI-assisted feature iteration, NPC and traffic AI

Gameplay Systems: Custom vehicle physics, NPC pick-up and drop-off, pedestrian crowds, traffic systems, mission loops, Unity Timeline, Cinemachine

Monetization: AppLovin MAX, Google AdMob, Unity Ads (rewarded, interstitial, banner)

Analytics and Live Ops: SolarEngine, Firebase Analytics, Firebase Remote Config, Crashlytics, Google Analytics

Architecture and Tools: ScriptableObjects, Git / GitHub, performance profiling (draw calls, memory, 60 FPS targets)

PROFESSIONAL EXPERIENCE

Unity Game Developer | OZI Technology, Lahore

Jun 2026 - Present

- Owned 3D simulation and arcade mobile games in Unity 3D and C#, from prototype through Google Play deployment.
- Used AI agents to accelerate prototyping, gameplay implementation, and bug-fix cycles without slowing release quality.
- Integrated AppLovin MAX and Google AdMob (rewarded, interstitial, banner) to support in-game monetization.
- Connected SolarEngine and Firebase Analytics for session tracking, user behavior, and retention funnels.
- Profiled and reduced draw calls, memory use, and load times to keep gameplay near 60 FPS on Android devices.

Unity Game Developer | Pragma Tech, Bahawalpur

Aug 2025 - Jun 2026

- Shipped 3D multi-vehicle simulation titles, including Pizza Boy Pizza Delivery, Newspaper Delivery Boy 3D, Firefighter Truck Simulator, and Auto Car Dealership.
- Built custom vehicle physics, traffic AI, pedestrian navigation, and interaction systems to improve control feel and world activity.
- Directed cinematic intros and gameplay transitions with Unity Timeline and Cinemachine.
- Coordinated 3D assets, textures, animation, and audio with cross-functional teammates for faster integration.

Unity Game Developer (Contract, Concurrent) | Doxfen Private Limited - Remote

Oct 2025 - Dec 2025

- Developed core 3D gameplay for Roadbound, an open-world transport and career simulation for Steam (coming soon).
- Implemented vehicle physics so player vehicles handle realistically while carrying and releasing NPCs.
- Built NPC pick-up and drop-off flow: NPCs walk to the vehicle, get picked up, ride, then drop at the destination.
- Added NPC walking/locomotion and living traffic so the open world stays active during jobs and exploration.

Unity Game Developer | AJ Tech, Bahawalpur

Jul 2024 - Aug 2025

- Designed 3D level layouts, obstacle collision logic, and reward loops for mobile simulation games.
- Connected games to live services for score submission and remote content updates.
- Debugged frame drops, memory spikes, and UI scaling across common Android aspect ratios.

SELECTED PUBLISHED GAMES

Roadbound | [Steam](#)

3D open-world transport and career sim for Steam. Owned vehicle physics, NPC pick-up/drop-off, NPC walking, and traffic systems. Developer: Doxfen. Coming soon.

Passengers Simulator | [Play Store](#)

3D prank game with one core loop: annoy and tease passengers through interactive tricks and funny reactions. That is the full theme of the game.

Euro Truck Driving Simulator | [Play Store](#)

3D heavy-vehicle cargo simulator with truck physics, highway delivery missions, weather, and customizable steering.

Flying Spider Hero Rescue | [Play Store](#)

3D open-world action title with web-swinging and flight physics, combat combos, city rescue missions, and camera targeting.

Pizza Boy Pizza Delivery | [Play Store](#)

3D timed city delivery game across scooters, bikes, cars, and a flying van, with urban traffic maps.

Firefighter Truck Simulator | [Play Store](#)

3D emergency driving and fire-rescue loop with water-spray systems and building hazard objectives.
